

# Technology Governance & Risk Foundations

RISHEN's flagship cohort-based program focused on how organizations govern technology decisions, manage risk, and assign accountability across cybersecurity, privacy, and AI.

## Who This Program Is For

Final-year students, early to mid-career professionals, and individuals seeking governance-level understanding of technology decisions. No prior certifications required.

## Program Structure

Duration: 8 weeks

Format: Live mentor-led sessions (online)

Style: Discussion-driven, case-based, reflective

Cohort: Students and working professionals

## Learning Journey

Governance and Accountability → Risk and Trade-offs → Controls and Failures → Standards Intent → Privacy and Trust → AI Governance (ISO/IEC 42001) → Integrated Decision-Making

## What You Will Gain

Governance-first thinking, risk-based decision reasoning, standards literacy without checklist dependency, and confidence to participate in leadership-level discussions.

## Certificate

Certificate of Completion – Technology Governance & Risk Foundations. Awarded based on participation and demonstrated reasoning.

RISHEN is a governance-first academic initiative focused on how organizations make decisions around technology and risk.
